

Vodafone Company Caller 60

Our extensive experience means we understand that managing the cost of mobile calls is becoming increasingly difficult. That's why we're bringing you a specially designed Vodafone business tariff, 'Company Caller 60', together with a level of service and client management tailored just for the business user.

Benefits of Company Caller 60

Cheaper business calls

Company Caller 60 links your business mobiles and fixed phones into one virtual private network (VPN), offering cheaper calls between your mobiles and calls from your mobiles back to the office.

Enhanced communications

Each mobile is assigned a short dial extension to fit in with your existing office dial plan, making it easier for staff to contact each other.

Improved customer service

As business mobiles become extensions of the office phone system it should mean fewer missed calls because staff will always have their phone with them and have access to a voicemail service.

Free minutes

The first 60 minutes of calls between company mobiles and from mobile to other company numbers is free of charge. These calls are known as 'on-net' calls.

It's easy to make savings. Setting up Company Caller 60 is simple; just contact our Mobile Specialists and provide a list of mobile and company numbers to be included on your dial plan.

Summary

- Five or more mobile handsets.
- Up to 10 different PSTN numbers (24 month contracts only).
- A total of 500 existing office extension numbers (DDI's) can be supported (24 month contracts only).
- Option to allocate extension numbers to each mobile phone to benefit from short code dialling.
- Extension numbers can start with any leading digit and are held on the Vodafone network.

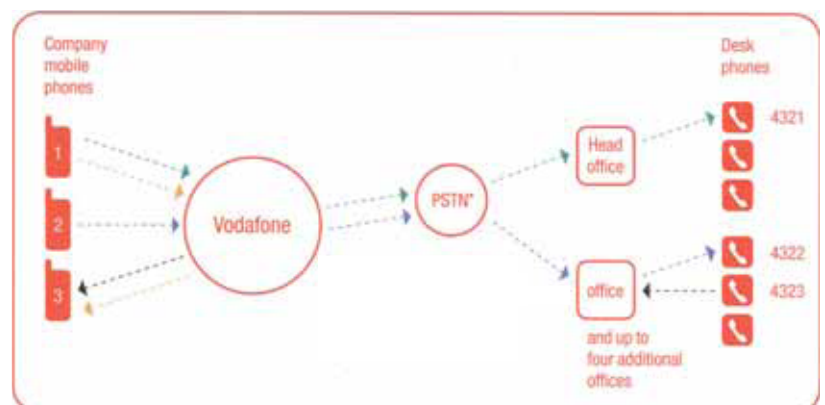

How it works

Green arrow: mobile 1 calls ext. 4321 [using the full number 020 8123 4321 or the short code extn. 4321] - qualifies for reduced rate.

Blue Arrow: mobile 2 calls ext. 4322 in one of the regional offices - qualifies for reduced rate.

Gold arrow: mobile 1 calls mobile 3 [full number or short code extn.] - qualifies for reduced rate.

Black Arrow: ext. 4323 calls mobile 3 either [full mobile number or mobile extn.] where a fixed cellular terminal is installed - the call is routed onto the Vodafone network and qualifies for reduced rate.

Benefits of Company Caller

• Integration

We have the ability and in-house expertise to integrate both mobile and fixed line calls with a high level of resilience. This means you'll receive one bill for all calls, enabling you to keep track of your mobile fleet and each mobile handset

• Dedicated daily point of contact

Our highly trained client managers provide one point of contact for any advice and operational support. This also includes a team of office-based client executives who provide a further level of support, as well as a team of mobile specialists and project managers, guiding and supporting you through every stage of the connection for complete peace of mind.

• Client Services

Our experienced mobile Client Services specialists will also assist in:-

- New connections, equipment and accessory orders.
- Arranging nationwide car kit installations.
- Complete handset support, including end-user support to your staff directly.
- Insurance claims and billing queries.
- 24 hour fault reporting, with on-call managers to assist with any urgent requests.
